

WEST AUSTRALIAN FRESH YABBIES

Scientific Name: Cherax spp

We have been supplying live Yabbies to national and international markets for many years and we are known as supplying only premium quality Yabbies to customers. A large volume of yabbies are available with a guarantee consistency of supply whilst the pristine water insures the highest quality robust animals for delivery live anywhere in the world.

The Process

The Yabbies are bought to the facility under a best practice regime, once in the shed the Yabbies are weighed and assessed for quality – any Yabby that do not meet quality criteria are rejected. All Yabbies are then graded and placed into live tanks, which are specifically designed to replicate an optimum growing environment. The Yabbies are not fed in the ‘livewell’ facility, this facet of the process is to purge the Yabbies of any remnants of stomach content.

Prior to packing your order the Yabbies are removed from the livewell and placed in the chiller so as to reduce the temperature and thus likelihood of stress to the animal. Following the chilling process the Yabbies are packed in eskies with damp cloth and frozen gel paks, so as to maintain temperature control, and then again placed in the chiller until the product is picked up by the courier for next day delivery.

Live Yabbies Price List - FOB Perth Airport

Buffet	(20 – 40 gms)	(approx 29 pces/kg)	AU\$POA/kg
Medium	(40 – 60 gms)	(approx 20 pces/kg)	AU\$POA /kg
Large	(60 – 80 gms)	(approx 14 pces/kg)	AU\$POA /kg
